

AMENDMENT DOCUMENT

Remarks pertaining to the Claims.

Please cancel Claims 1-17 and enter new Claims 18-25.

We Claim:

18.(New) A Fire Protection System comprising:

A water holding tank connected to a water supply to receive water from a source of water,

A water passage line connecting the water holding tank to a multiplicity of sprinkler components positioned on a roof of a structure,

A water pump connected to a source of electricity for operation and connected to said water passage line to receive water from the water holding tank and deliver water to the sprinkler components,

Each sprinkler component comprises a sprinkler head which is adjustable both in direction of water spray and volume of water flow,

A soffitt member depends from said roof with sprinkler components mounted on said soffitt, with said sprinkler components having sprinkler heads aimed toward a side of said structure,

A gutter is connected to an edge of said roof to collect water flow from said roof to return water thru a water return line to the water holding tank,

Said water return line includes a removable filter member.

19.(New) A Fire Protection System as described in Claim 18, wherein:

Said roof comprises a false roof positioned upon said roof and sprinkler components are mounted upon said false roof.

20.(New) A Fire Protection System as described in Claim 18, wherein:

Said water holding tank is positioned underground neard said structure and below an anticipated line of frost in the ground.

AMENDMENT DOCUMENT

New Claims (cont.)

21.(New) A Fire Protection System as described in Claim 18,
wherein:

Said water holding tank includes means for inspecting conditions
of said tank.

22.(New) A Fire Protection System as describe in Claim 18,
wherein:

Said water holding tank includes an overflow valve.

23.(New) A Fire Protection System as described in Claim 18,
wherein:

Said water pump includes a switch member.

24.(New) A Fire Protection System as described in Claim 18,
wherein:

Said source of electricity comprises a utility source of
electricity.

25.(New) A Fire Protection System as described in Claim 18,
wherein:

Said source of electricity comprises an assembly of batteries.
